Sneha T K

Python Developer | Django | REST APIs | Backend Engineering

Bengaluru, India • +91 9019953327 • tksneha7@gmail.com • LinkedIn

PROFESSIONAL SUMMARY

Results-driven Computer Science Engineering student with hands-on experience building web applications using Python, Flask, and REST APIs. Eager to deepen expertise in Django and distributed systems as a Python Developer Intern. Passionate about writing clean, maintainable backend code, tackling complex engineering challenges, and continuously learning new frameworks and technologies on the go.

TECHNICAL SKILLS

Primary Language: Python (advanced) — data pipelines, ML models, REST APIs, automation

Web Frameworks: Flask (production use), Django (learning), Node.js

REST APIs & Backend: REST API design, JSON, authentication (token/session), role-based access control

Databases: MySQL, MongoDB, Firebase Realtime Database

Frontend: React.js, HTML, CSS, JavaScript

Cloud & DevOps: AWS, Docker, Git, GitHub

AI / ML: Machine Learning, NLP (Basics), Model Training & Evaluation, Scikit-learn

Data Science: Pandas, NumPy, Matplotlib, Feature Engineering, EDA

PROJECTS

AI-Powered Skill Gap Analyzer | *Web Application* 2025

- Built a Python + Flask REST API backend that parses resumes and maps extracted skills to industry role requirements using NLP keyword matching.
- Designed and implemented structured API endpoints with role-based output — demonstrating backend architecture aligned with REST API best practices.
- Developed a React.js frontend consuming the API to deliver personalized skill recommendations in a responsive UI.
- Stack: Python, Flask, React.js, HTML, CSS, JavaScript, NLP

Student Performance Prediction System | *AI/ML & Data Science* 2026

- Engineered an end-to-end Python ML pipeline: data ingestion, cleaning, feature engineering, model training, and evaluation — achieving ~90% accuracy.
- Applied regression models using Scikit-learn on academic and demographic datasets with thorough EDA via Pandas, NumPy, and Matplotlib.
- Structured the project as a modular Python codebase, demonstrating production-level code organisation skills applicable to Django microservices.
- Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib

Wivaah – Real-Time Chat Application | *Full Stack* 2025

- Architected and implemented backend services for real-time messaging and secure user authentication using Firebase.
- Optimised frontend-backend data flow to reduce latency, gaining practical experience in distributed, event-driven architectures.

- Stack: Flutter, Firebase, Realtime Database

INTERNSHIP / TRAINING

Software Intern – Hands-On Project Program | *Samsung Innovation Center* 2024 – Present

- Receiving structured training in real-world software development with a project-based curriculum focused on distributed systems and scalable applications.
- Collaborating in team settings to deliver production-grade features, mirroring the ownership-driven culture required for a Python developer role.

EDUCATION

Bachelor of Engineering – Computer Science | *Dayananda Sagar College of Engineering, Bangalore*
2023 – 2027

- CGPA: 9.32 / 10.0
- Relevant coursework: Data Structures & Algorithms, Database Management, Operating Systems, Computer Networks, Software Engineering.

CERTIFICATIONS

- Python for Data Science – Udemy
- Machine Learning by Andrew Ng – Coursera
- SQL Basics to Intermediate – Codecademy
- Web Development – Coursera

ACHIEVEMENTS

- 1st Place – Bhasha Bandhu Hackathon: Delivered an innovative AI-based solution under competitive time constraints, demonstrating problem-solving and rapid prototyping skills.
- Active participant in hackathons and coding challenges — consistently seeking out new technical challenges and picking up unfamiliar frameworks quickly.
